

International Meeting
Florence 31 August – 1 September 2018

Patient safety for new medical generation

Promoting human factors culture in young medical doctors

Organized by:

In collaboration with:

REGISTRATION LINK

The goal of this event is promoting patient safety culture in new medical generations and to spread the knowledge on ergonomics and human factors among health care professionals.

The meeting is connected with the Triennial Congress of International Ergonomics Association (www.iea2018.org) that will be held in Florence from the 26th to the 30th August 2018.

The IEA Congress will be attended by more than 1500 ergonomics and human factor experts coming from more than 80 countries (www.iea.cc).

The WHO International Meeting aims at involving delegation of residents from all around the world. The participation is free for all residents and a special fee for lunch and dinner will be granted to students in the cafeteria of the University of Florence.

The meeting is a CME accredited programme.
