Instructions to Authors

For detailed instructions please refer to our website on the Internet, www.iospress.nl

Submission of manuscripts: Authors are requested to submit their manuscript electronically to workjacobs@gmail.com

Preparation of manuscripts:

1. Manuscripts must be written in English. Authors whose native language is not in English are recommended to seek the advice of a native English speaker, if possible, before submitting their manuscripts. Please use person first language; that is a person with an injury, not an injured person.
2. Manuscripts should be typed on one side of the paper only, with wide margins and double spacing throughout. For the electronic file of the text you may use any standard word processor. Do not use page layout software and do not send PostScript files of the text. The preferred length of a manuscript is 20-30 pages double spaced (not including references, tables or figures), Typically, the journal only publishes data collected within the past 5 years. Include the degree to which your paper builds on and advances on knowledge published within WORK.
3. Manuscripts should use wide margins and double spacing throughout, including the abstract, footnotes and references. Every page of the manuscript, including the title page, references, tables, etc., should be numbered. However, in the text no reference should be made to page numbers; if necessary, one may refer to sections. Try to avoid the excessive use of italics and bold face.
4. **Manuscripts should be organized in the following order:**
 - Title page
 - Introduction
 - Body of text (divided by subheadings)
 - Conclusion
 - Acknowledgements
 - References
 - Tables

- Figure captions
- Figures

5. **Headings**

Headings and subheadings should be numbered and typed on a separate line, without indentation. SI units should be used, i.e., the units based on the metre, kilogramme, second, etc.

6. **Title page**

- The title page should provide the following information:
- Title (should be clear, descriptive and not too long)
- Name(s) of author(s); please indicate who is the corresponding author
- Full affiliation(s)
- Present address of author(s), if different from affiliation
- Complete address of corresponding author, including tel. no., fax no. and e-mail address
- Abstract (The abstract should be clear, descriptive, self-explanatory and no longer than 200 words. The following subheadings should be used: BACKGROUND, OBJECTIVE, METHODS, RESULTS, CONCLUSIONS. It should also be suitable for publication in abstracting services)
- Keywords (3-5 words not in your title)

7. **Tables**

- Tables should be numbered according to their sequence in the text. The text should include references to all tables.
- Each table should be provided on a separate page of the manuscript. Tables should never be included in the text.
- Each table should have a brief and self-explanatory title.
- Column headings should be brief, but sufficiently explanatory. Standard abbreviations of units of measurement should be added between parentheses.
- Vertical lines should not be used to separate columns. Leave some extra space between the columns instead.
- Any explanations essential to the understanding of the table should be given in footnotes at the bottom of the table.
- Table captions should be provided all together on a separate sheet.

8. **Figures**

- Figures should be numbered according to their sequence in the text. The text should include references to all figures.
- Each figure should be provided on a separate sheet. Figures should not be included in the text.
- Color figures can be included, provided the cost of their reproduction is paid for by the author.
- For the file formats of the figures please take the following into account:
line art should have a minimum resolution of 600 dpi, save as EPS or TIFF
grayscale (incl photos) should have a minimum resolution of 300 dpi (no lettering), or 500 dpi (when there is lettering); save as tiff do not save figures as JPEG, this format may

lose information in the process; do not use figures taken from the Internet, the resolution will be too low for printing; do not use colors in your figures if they should be printed in black & white, because this will reduce the print quality (note that in software often the default is color, you should change the settings)

- For figures that should be printed in color, please send both a hard copy (to be used for the paper publication), and a CMYK encoded EPS or TIFF (used for the electronic publication)
- Each figure should be identified by its number. If necessary, indicate top or bottom of figure.
- Figures should be designed with the format of the page of the journal in mind. They should be of such a size as to allow a reduction of 50 %.
- On maps and other figures where a scale is needed, use bar scales rather than numerical ones, i.e., do not use scales of the type 1:10,000. This avoids problems if the figures need to be reduced.
- Each figure should have a self-explanatory caption. The captions to all figures should be typed on a separate sheet of the manuscript.
- Photographs are only acceptable if they have good contrast and intensity
- Each illustration should be provided on a separate sheet. Illustrations should not be included in the text. The original drawings (no photocopies) are required. Electronic files of illustrations should preferably be formatted in Encapsulated PostScript Format.
- Footnotes should be kept to a minimum, and they should be provided all together on a separate sheet.
